Hey there, I am Alice, I am 26 years old master student in CMU whc lives in California. My major is user experience designer. I use TikTok to enrich my friend-zone and get inspired. Recently, I found this new cool feature called "VR PingPong" on TikTok. It is awesome. Let me show you in a sec...

I am browsing the profile online, a Douyin user called "Bob" is poping up, he is doing some sutpid/ funny eat show now

let me try to invite him for a quit PingPong gym to try out the VR stuff

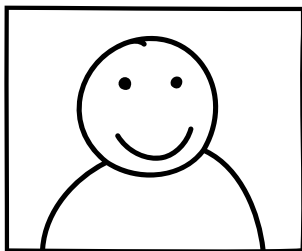

From Alice:

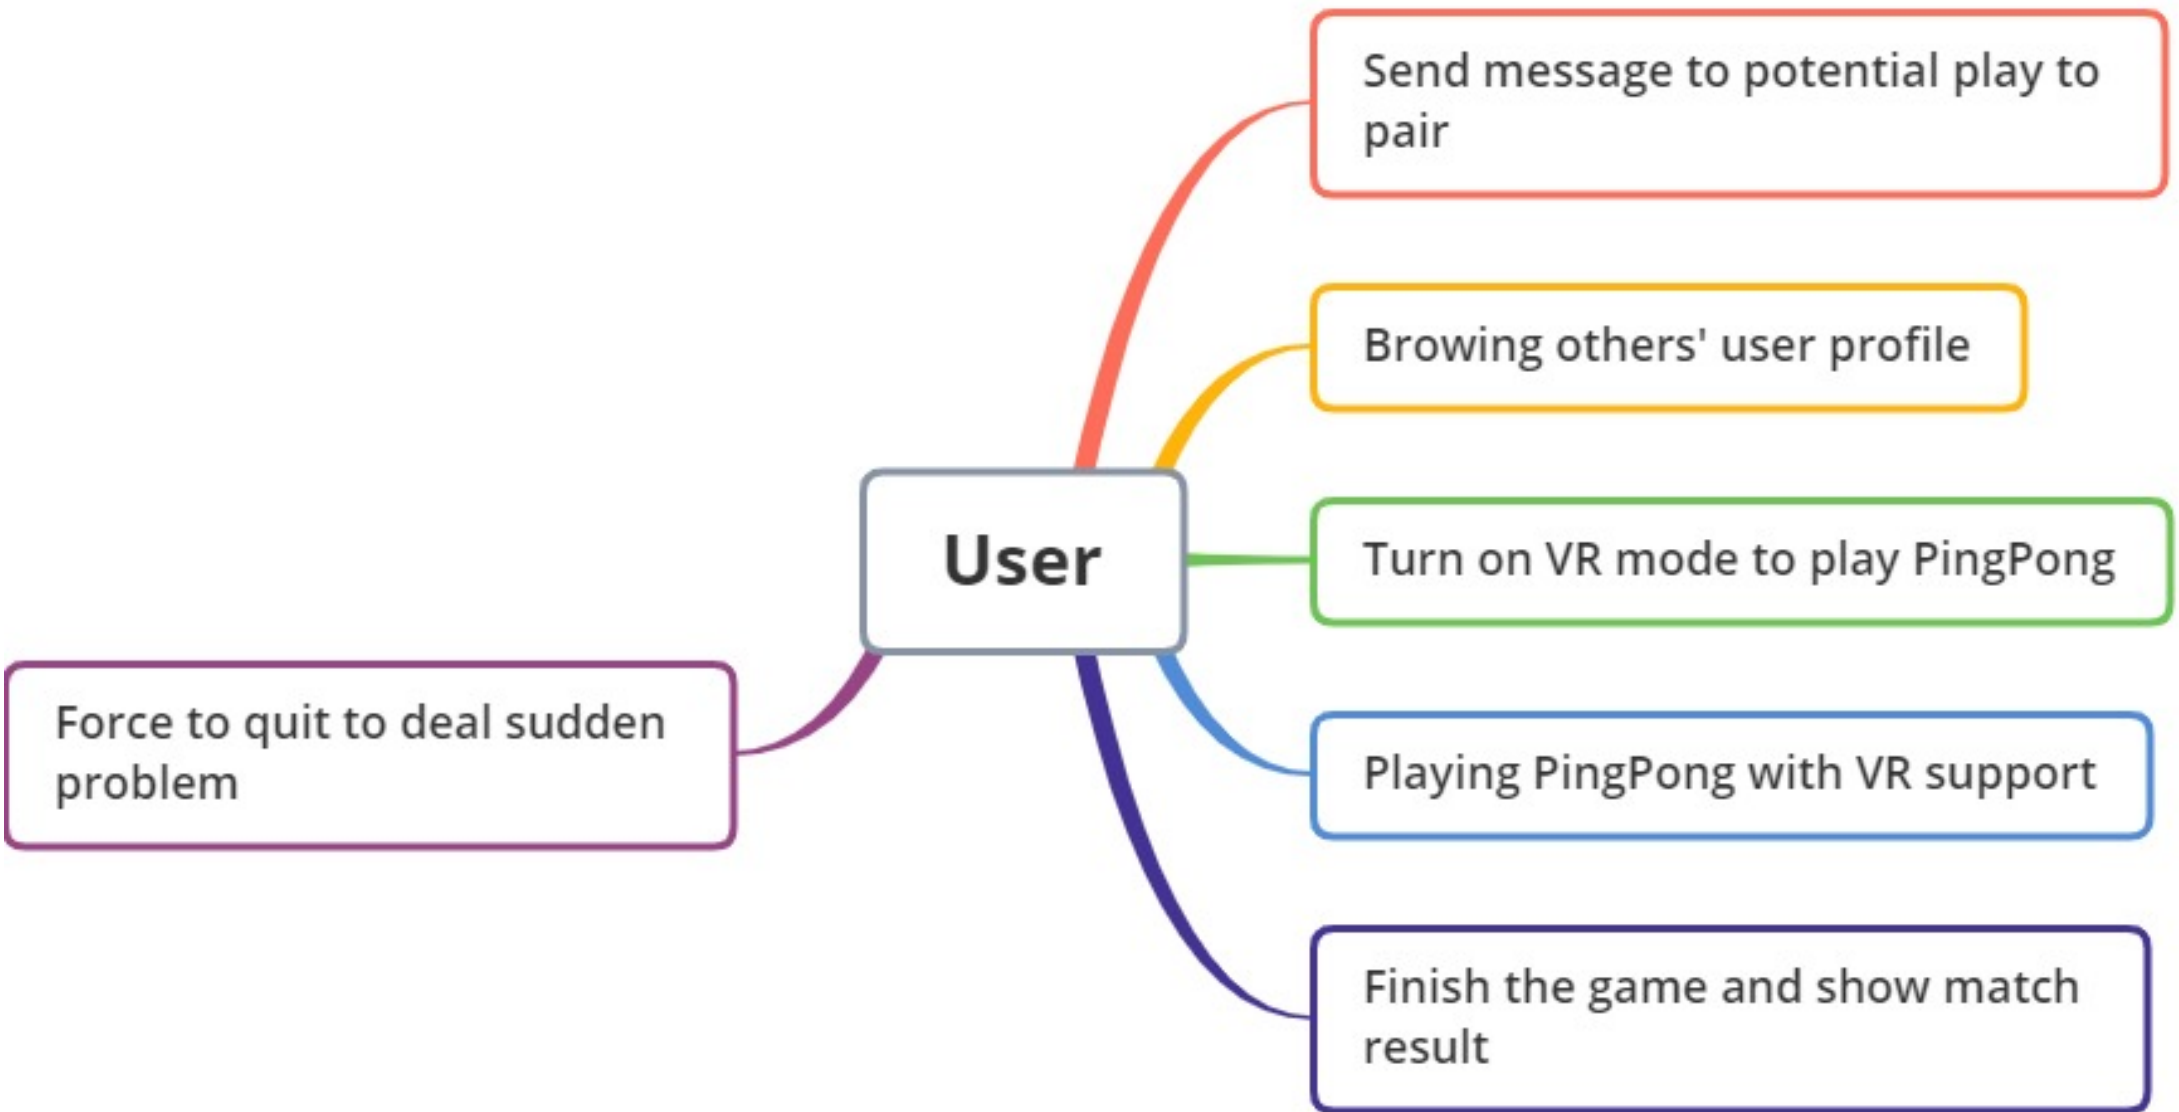

Hi Bob, do you want to play VR PingPong, since you are from China, and sports is just as fun as your eat show. The only difference is that you become slim and healthy afterwards.

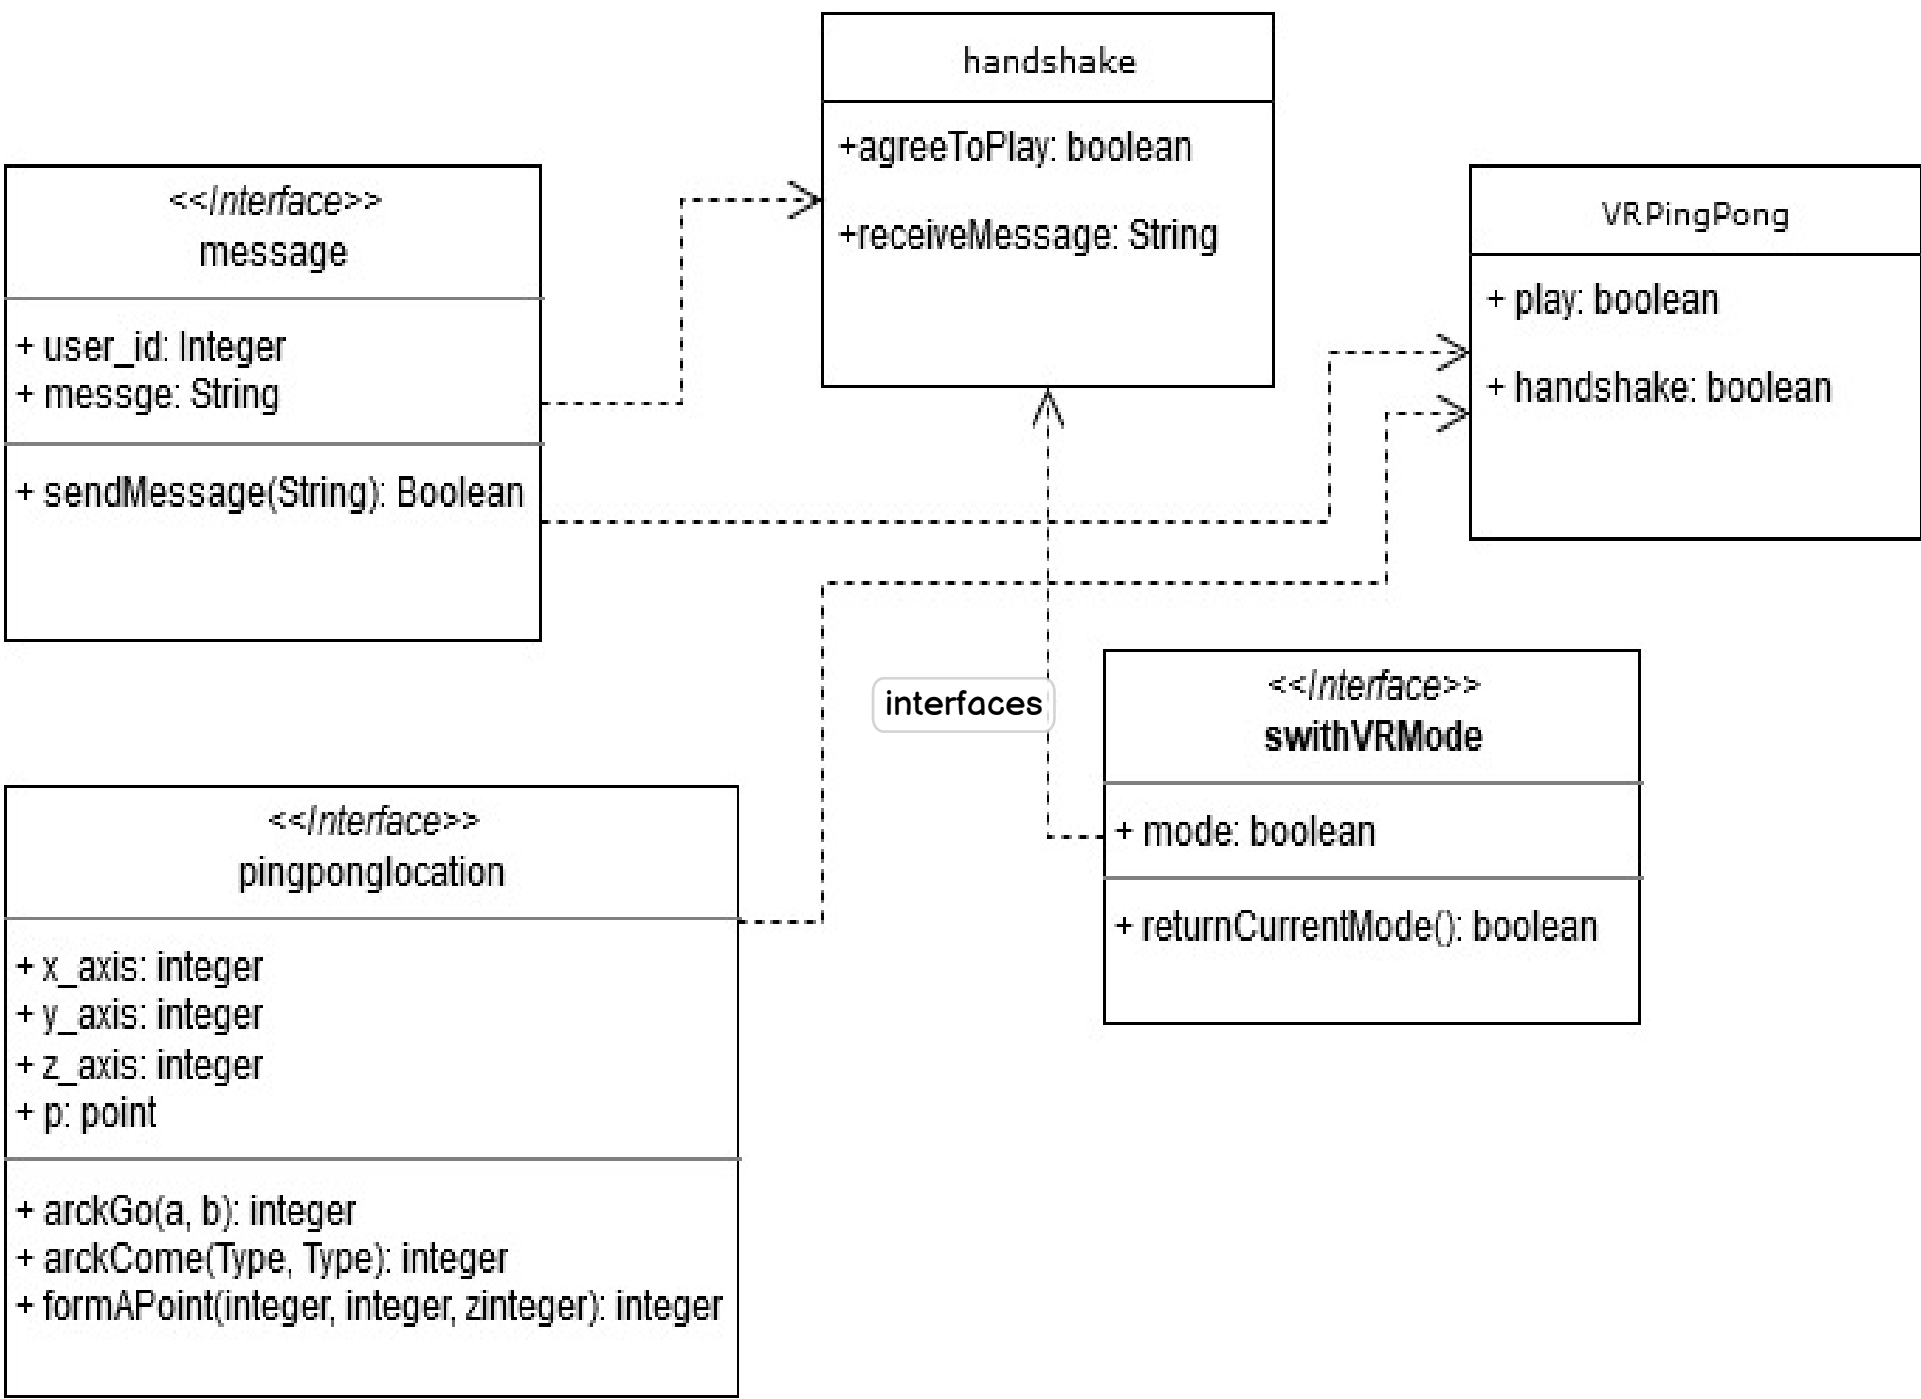

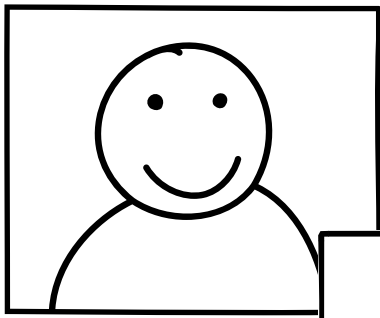

Bob turns on the VR button as well as an acception for the invitation.

They are playing PingPong in VR mode by this process, and it is crossing APP...

Ok, now you understand how much fun that I received from this new cool stuff, just try out. Along side the mentioned stuff, the innotitive parts are:

- ☒ corssing apps
- ☒ VR interactions
- ☒ social bonding to form better relationship which fill the gap of products from ByteDance.
